COURSE HIGHLIGHTS

> Modules

- Python for Data Science
- Numpy and Pandas
- Data Visualization
- Mathematics and Statistics
- EDA
- SQL for Data Science
- Machine Learning Fundamentals
- Deep Learning
- Natural Language Processing
- Project Work

> Skills participants will gain

- master Python for Data Science
- Handle Data with Numpy and Pandas
- Create Stunning Visualizations
- Understand Machine Learning
- Work with SQL for Data Science
- Dive into Deep Learning
- Apply Mathematics and Statistics
- Gain Practical Experience with Project Work

WHAT ARE GRADUANTS SAYING?

Samuel Leparan

'm incredibly grateful to StatQuestJourney Hub for their outstanding support and guidance. I've witnessed my growth in data science skills in a well-structured and engaging learning environment..

Duration

3 Months

Total Cost

ksh20,000

Mode of delivery

online, hybrid, self-paced, or live sessions

KEY BENEFITS

- Real-world projects
- taught by industry experts
- Access to resources and tools
- Job-ready skills
- Assistance with LinkedIn Page Setup
